

Smart Outfits for every job¹

With Smart Outfits that anyone can change at a moment’s notice, HMD Fusion Business Edition turns up dressed for the occasion. During the week, you can rock a rugged and wireless outfit, perfect for your business needs. But when the weekend rolls around, just switch it to a sleek casual outfit, that adds that extra touch of style to your time off.

Getting the functionality, you want is just a case of swapping the Smart Outfit¹. Forget about juggling multiple devices from different suppliers—just switch the outfit on your Fusion to access all the tools you need.

Long-Term Security and Hassle-Free Repairs

Investing in HMD Fusion Business Edition means long-term peace of mind with 5 years of security updates² and a 3-year warranty, so you can focus on your business without worrying about tech issues.

And if you ever need repairs, we’ve got you covered with our Door-to-Door Care via DHL Express—just schedule a pickup from anywhere in Europe, and we’ll handle the rest, ensuring quick and easy repairs right from your doorstep.

Looking for off-the-shelf solutions?

Thanks to our partnership with Copernic, we’re adding several Smart Outfits to the range. With the Barcode Scanner Outfit, HMD Fusion is transformed into a high-performance scanner in a matter of seconds, great for ticket checking, inventory control or courier delivery. And the Access Control Outfit allows users to provide Access ID card reading capability virtually anywhere.

Feeling creative?

Thanks to the [open-source developer toolkit](#), you can create your own Smart Outfits. Running a delivery service? Transform your HMD Fusion into a real-time tracking device. Need a seamless payment solution? Convert the HMD Fusion Business Edition into a tap-to-pay terminal. You’ll need the CAD file, and if you’re building something with functionality, the API. Get them both from the HMD Fusion toolkit.

¹Smart outfits sold separately.

²From the global launch date of HMD FUSION.

³Pre-installed system software and apps use a significant part of memory space.

⁴Up to 8GB in 8GB variant. Using memory extension (virtual RAM) requires enough storage space. To protect the storage, memory extension is automatically and permanently disabled once 90% of the usage limit is reached. This can occur after 4 years of heavy usage.

⁵Battery has limited recharge cycles and battery capacity reduces over time. Eventually the battery may need to be replaced.

⁶Battery has been tested by HMD Global to maintain at least 80% of its original capacity after 800 full charging cycles.

⁷Based on a real life usage test by HMD Global. See more info at www.hmd.com/hmd-fusion
