TOUCHSCREEN RECOMMENDATIONS

ID PLATFORM IS EQUIPPED WITH A 5 POINTS MULTITOUCH GFF SENSOR TYPE.

- Do not allow the touchscreen to come into contact with other electrical devices.
- Electrostatic discharges can cause the touchscreen to malfunction.
- To avoid damaging the touchscreen, do not tap it with anything sharp or apply excessive pressure to it with your fingertips.
- The device may not recognize touch inputs close to the edges of the screen, which are outside of the touch input area.
- It is recommended to use fingers or dedicated touch stylus when using the touchscreen.

Setting up your device

CAUTION

ID Platform FAP50 can accommodate only one type of removable battery.

Charge the BATTERY

- 12.600 mAh battery should be charged ONLY with the charger provided. Damage occurring when using another charger will not be covered by the warranty.
- Charge the battery using the COPPERNIC charger:
 - Insert the DC Power Jack plug into the ID Platform tablet.
 - Put the suitable country power adapter into plug.

Using your device

TURNING ON | TURNING OFF your device

Power On | Press and hold during 3 sec. the power button.

Power Off | Press and hold during 3 sec. the power button and select "Power off" in the dialog box.

Reboot | Press and hold during 3 sec. the power button and select "Reboot" in the dialog window to restart the device.

Suspend Mode | Press and release the power button to place the device in suspend mode. The display will be off and go into a low power state to save battery power.

Reset | Press and hold the power button during 13 sec.

power key

USB Communication Management

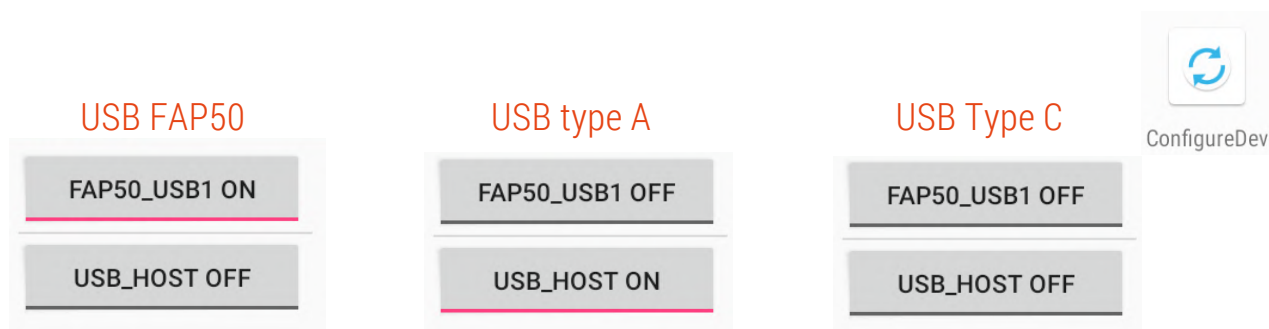

The ID Platform is equipped with **1x USB** communication port internally switched to manage different peripherals:

- USB Expansion (for FAP50 peripheral)
- USB type A host connector
- USB type C for service port

The USB for internal peripherals and external USB-A are the USB lines with the high priority level.

USB-C service port is not available when an internal peripheral or USB-A is turned on.

To manage the USB communication, please use the ConfigureDev application and enable/disable the required options:

Using your device

DATA CAPTURE | photos & videos

Use the rear or the front camera to take photos and capture videos.

1. Go to Home Screen > select "Camera" > Tap camera icon or screen to take a picture/switch to video icon and tap for video recording.
2. Using the rear or the front camera to take photos and capture video.

NOTE

Ensure device memory or Micro SD card space is available.

DATA CAPTURE | NFC & biometrics

NFC & IRIS SCANNER (optional)

To read NFC card, please put the TAG/CARD on the NFC area.

Use dedicated application for iris identity enrolment. Use iris scanner on the back of the tablet to authenticate.

FINGERPRINT SENSOR

Please put the finger(s) on the fingerprint sensor taking care to make contact with the metal part.

NOTE

Fingerprint sensor is connected on the USB line for internal peripherals with the highest priority level.

USB-C service port is not available when fingerprint sensor is turned on.

Battery Information

Use only COPPERNIC approved batteries.

When devices are stored over six (6) months without use, some irreversible deterioration in overall battery quality may occur. Store devices at half of full charge in a dry, cool place. When storing devices for one year or longer, the charge level of battery should be verified at least once a year and charged to half of full charge.

Battery Safety

1. The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non-commercial environment.
2. Follow battery usage, storage, and charging guidelines found in the user guide.
3. Improper battery use may result in a fire, explosion, or other hazard.
4. To charge the device battery, the battery and charger temperature must be between 0°C~+45°C.
5. Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or the hazard.
6. Do not disassemble or open, crush, bend or deform, puncture, or shred the device.
7. Severe impact from dropping any battery-operated device on a hard surface could cause the battery to overheat.
8. Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.
9. Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.
10. Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place battery into a microwave oven or dryer.
11. Battery usage by children should be supervised.
12. Please follow local regulations to promptly dispose of used re-chargeable batteries.
13. Do not dispose of batteries in fire.
14. Seek medical advice immediately if a battery has been swallowed. In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.
