<u>FOR IMMEDIATE RELEASE</u>

Mobile Security Solutions Inc and Coppernic announce a new market Partnership

Bringing cutting edge technology to mobile access control

Los Angeles - 4/25/2022 — Today, Mobile Security Solutions announce the immediate availability of their Precog software suite embedded in the Coppernic C-One^2 handheld device.

This brings the best mobile hardware into the North American market aligned with the most advanced software integrated to PACS and other enterprise databases.

"*We are delighted to give integrators and users the choice to adopt the most flexible identity-based security software within a robust and leading-edge hardware package*" said Archie Galbraith, CEO at Mobile Security Solutions.

<u>Market Impact</u>
Coppernic's European customers already have access to the combination of C-One^2 hardware and Precog software as an alternative to older technologies.
This announcement makes the new product combination available to North American market. Rapid deployment and ease of use provide an unparalleled opportunity for integrators to support their customers mobile access control needs.
"*Coppernic has a competitive advantage in North America with our existing and upcoming handheld products. Offering Precog software to our users helps them get value from our products quickly and easily in the areas of access control and event management*" said Rob Vandervecht, Chief Marketing Officer, Coppernic Canada.
